

Step 1: Preparation

Clean the area where you will be using the Water Dam with a household cleaner or a solution of 50/50 isopropyl rubbing alcohol. Allow to thoroughly dry.

Step 2: Measure & Cut

A) Place the Water Dam across where you are going to install it. Mark the needed length with a pen or marker to indicate where to cut.

B) Trim off the excess section of Water Dam with a utility knife or heavy duty scissors.

Step 3: Peel & Apply

A) Peel back 1/4" of the red backing tape on both strips.

B) Focus on one strip, peel 6" of backing tape and press into place. Avoid stretching the Water Dam during this application. Continue until one complete length of adhesive is sealed to the surface.

C) Repeat this process with the other strip of adhesive.

Step 4: Press to Secure

To ensure a good seal with your bathroom floor use a roller to apply pressure to the length of the seal. Allow 24 hours for seal to reach maximum adhesion.

Please Note

Some tile sealer products can effect a good bond or a section can be caught and break its seal - construction adhesive such as Liquid Nail or PL 2000 which is found in most hardware stores can be used to reapply water dam to your shower stall surface.

Please call or write if you have any additional questions or concerns.

Other StayDry Products

Shower Curtain Kits

Kits include either a Fabric or PEVA shower curtain. Curtains feature sleeves to hold the tubes or cords inside the edges of the curtains.

Fabric Shower Curtain Kit

Durable, washable polyester fabric curtain with anti-microbial protection. Prevents growth of bacteria, mould and mildew. Curtains are 72.5" long and available in 36", 46" or 66" widths.

Enviro Shower Curtain Kit

Inexpensive and easy way to create an instant shower door. Our waterproof plastic PEVA curtains are chlorine free, biodegradable and do not give off odors.

Extra Long Shower Rings

Standard length shower curtains not quite long enough for you? Use our long shower rings to lower your curtain. Available in lengths from 4.5" up to 8.5".

Shower Curtain Sealer

Creates an Instant Shower Door with your *existing* shower curtain against any shower wall. Installs in seconds! Easy to use.
